

## ***CLASS SERIES SURVEY !***

*The goal of this report is to present the results of the “Class series” survey. The report contains information collected from 13 of my classmates, who were asked 5 questions about the series.*

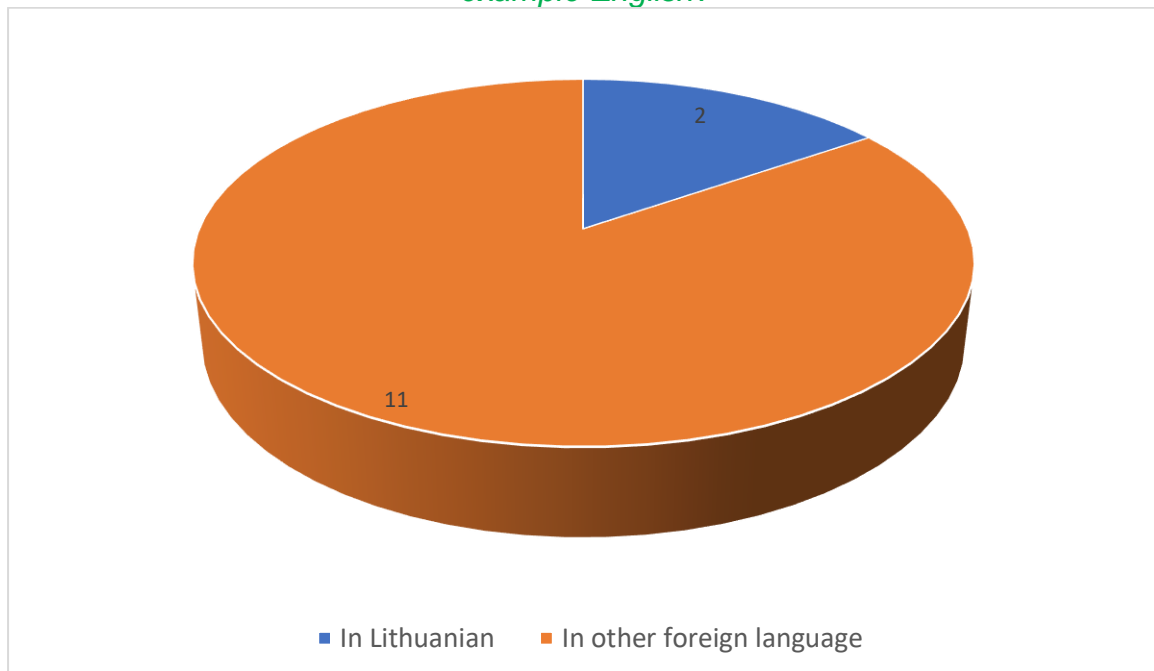

*By Kamilė Justaitė*

### ***1. How often do you watch TV series?***

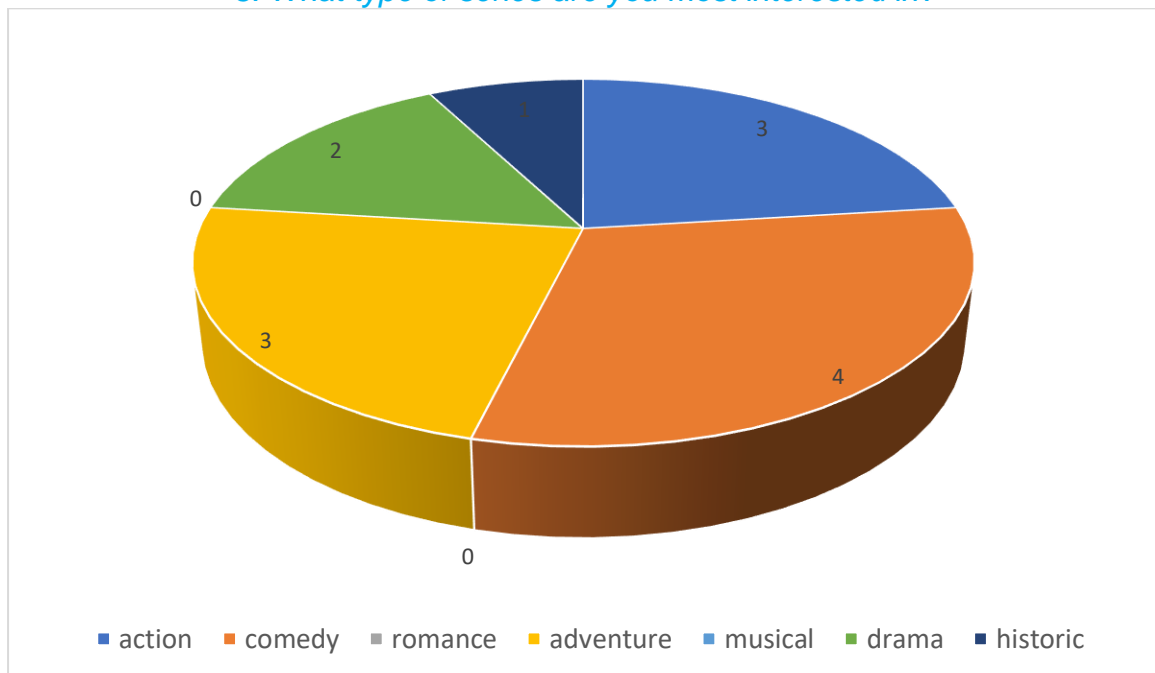

*What is very clear from the chart is that almost all responders watch TV series every day and only one student does it once a week.*

### ***2. Do you prefer watching series in Lithuanian or in other foreign languages, for example English?***

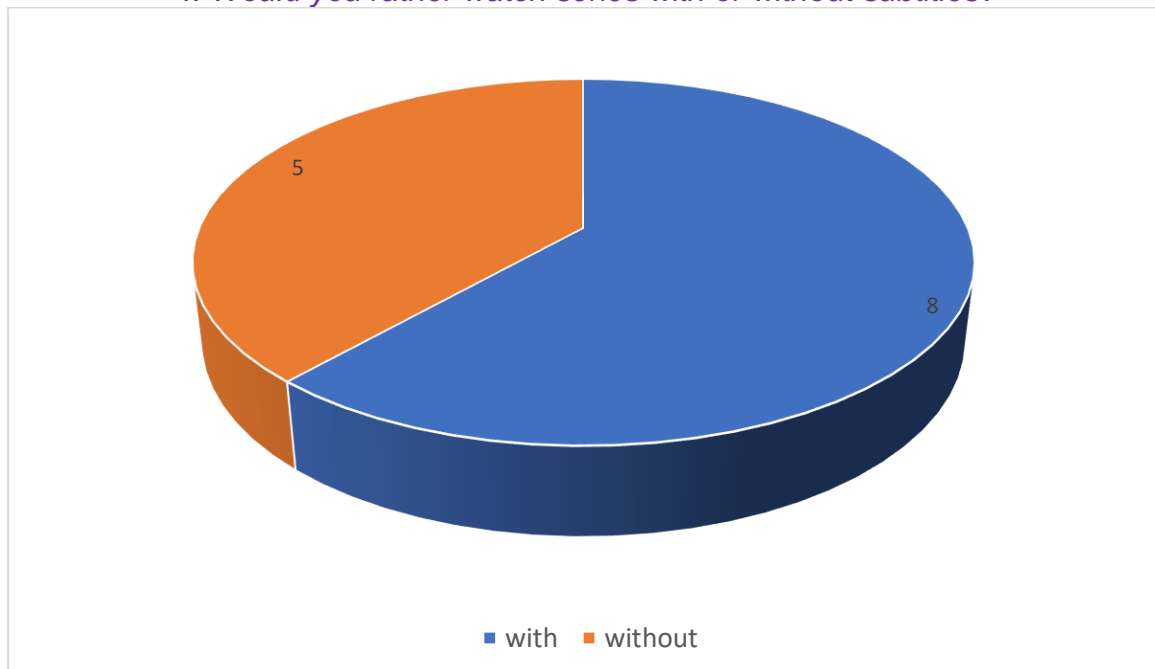

*I am really surprised to see that nearly 85 percent of students prefer watching series in other foreign languages, and just 15,5 percent watch it in Lithuanian.*

### *3. What type of series are you most interested in?*

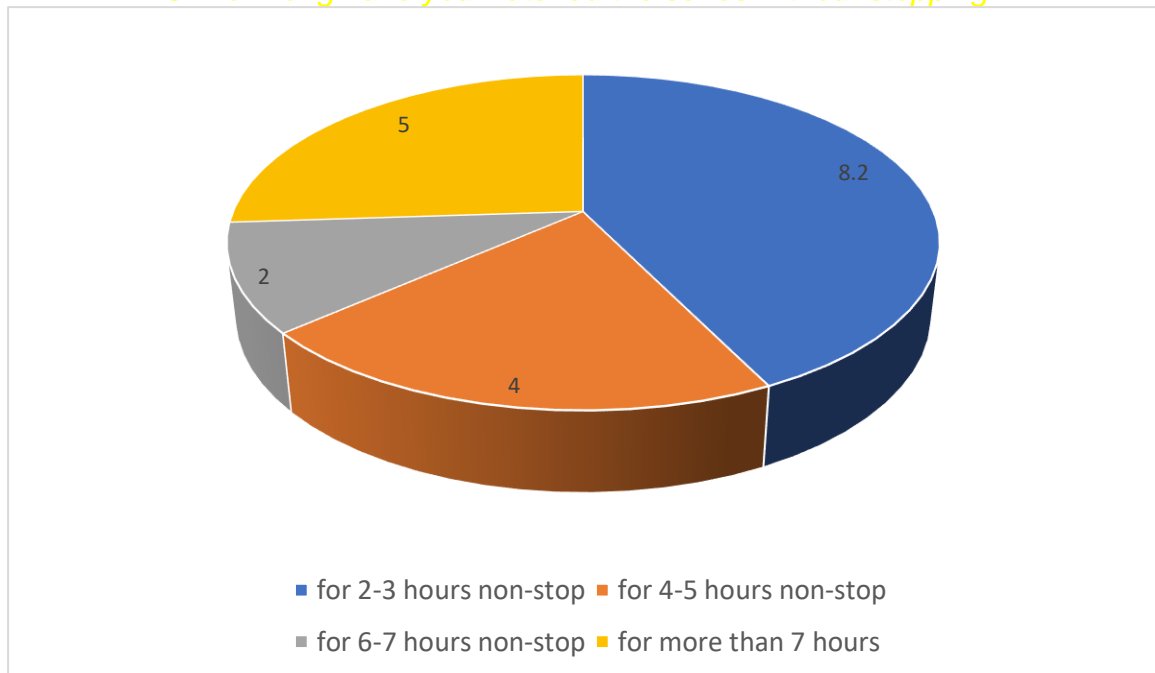

*Another interesting point is that most of my classmates are interested in comedy type series and surprisingly, nobody watches romance or musicals.*

### *4. Would you rather watch series with or without subtitles?*

*The majority of students state that they would rather watch series with subtitles.*

*5. How long have you watched the series without stopping?*

*It can be seen that two fifths of responders have watched the series for more than 7 hours without stopping. That's impressive.*

*To sum up, I think this survey proves that most teenagers spend their free time watching different types of TV series, but I don't blame them, as I do exactly the same thing.*
