**A survey report about food**

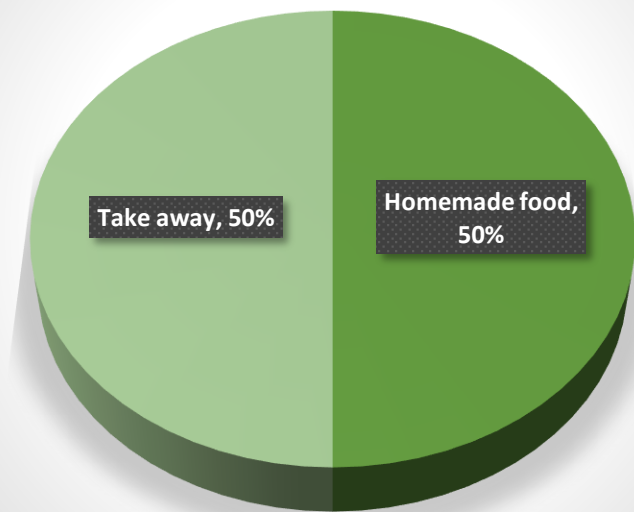

**My classmates favourite meal**

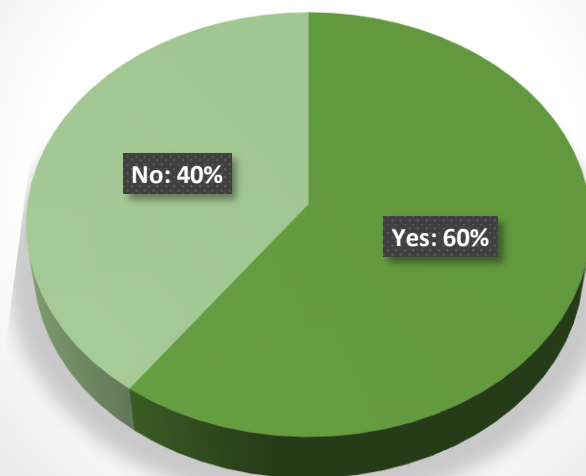

**How often do my classmates eat this meal?**

### What do my classmates prefer?

### Do my classmates like trying untasted meals?

I asked ten people in my class questions about food. Here are the results of my survey.

Most of my classmates' favourite meal is pizza. Thirty per cent like sushi. Twenty per cent like kebabs and ten per cent prefer other meals. Half of my classmates eat their favourite meal several times a month and a few people several times a week. And ten per cent several times a year.

Half of my classmates like homemade food and half like to order take away. The majority of my classmates like trying untasted meals and forty per cent don't like to try.
